

## UNIROSS Ni-Mh BATTERIES

### PLEASE READ INSTRUCTIONS BEFORE USE

*Thank you for purchasing this Uniross Battery Charger. Please read this Instruction manual carefully, as it contains important operating information.*

#### **Important Safety Instructions:**

- Please observe polarity (+) (-).
- Do not open, disassemble, or dispose of in fire.
- Do not short circuit.
- Do not expose to heat or moisture.
- Do not mix charged and uncharged batteries, or batteries of different sizes/ capacities/ types.
- Please observe charging times as indicated by your charger.
- Keep out of reach of children
- Remove batteries from charger/device in case of extended periods of non-use.
- Replace all batteries at the same time, with identical charged batteries.
- Recharge using a Uniross Battery Charger for best performance.

#### **RECYCLE:**

Old Uniross rechargeable batteries are recyclable.

- Do not dispose of in the waste bin.
- Return to a collection point for recycling.

#### **Charging Times:**

Charging times of rechargeable batteries depend entirely on two factors:

- The type of Battery Charger
- The size and capacity of the battery being recharged.

*\* Please refer to your charger instruction manual for indication of approximate charging times. It is not possible to indicate the charging time for your battery without knowledge of the type of battery charger being used.*
